ROAD REHABILITATION WORK ON NH ROUTE 87 IN EPPING
ABOUT ONE-HALF MILE AT INTERSECTION OF JACOBS WELL ROAD

The New Hampshire Department of Transportation announces pavement rehabilitation work is expected to begin Thursday, September 11, 2003 on an approximately half-mile section of NH Route 87 at the intersection of Jacobs Well Road in Epping.

Motorists should anticipate traveling on a gravel surface through this area for one month. Uniformed officers and flaggers will assist traffic through the work zone, which will require occasional one-way alternating traffic. Beginning October 11, 2003, one-way alternating traffic controlled by traffic signals will be in effect on new pavement until Thanksgiving.

E.D. Swett Inc., of Concord, New Hampshire is the general contractor for the \$2.3 million project, which involves realigning sections of NH Route 87 and constructing a new bridge over the Lamprey River. The scheduled completion date of the project is June 2004.
